

CCA Status and Plans

CCA Forum Tutorial Working Group

http://www.cca-forum.org/tutorials/ tutorial-wg@cca-forum.org

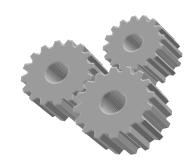

CCTTSS Research Thrust Areas and Main Working Groups

- Scientific Components
 - Scientific Data ObjectsLois Curfman McInnes, ANL (curfman@mcs.anl.gov)
- "MxN" Parallel Data Redistribution
 Jim Kohl, ORNL (kohlja@ornl.gov)
- Frameworks
 - Language Interoperability / Babel / SIDL
 - Component Deployment / Repository
 Gary Kumfert, LLNL (kumfert@llnl.gov)
- User Outreach

David Bernholdt, ORNL (bernholdtde@ornl.gov)

Scientific Components

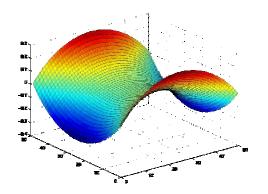

- Abstract Interfaces and Component Implementations
 - Mesh management
 - Linear, nonlinear, and optimization solvers
 - Multi-threading and load redistribution

- Visualization and computational steering
- Quality of Service Research
- Fault Tolerance
 - Components and Frameworks

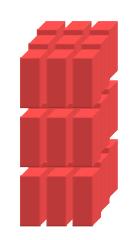

Scientific Components Extended R&D Agenda

- Complete development of abstract interfaces and base component prototypes
- Advanced component development
 - Second-level component extensions
 - Application-specific components for chemistry and climate
- Implement fault tolerance and recovery mechanisms
- Develop quality of service models for numerical components
 - Integrate QoS system into repository
- Develop interfaces and implementations for multi-level nonlinear solvers and hybrid mesh management schemes
 - Collaboration with TOPS and TSTT centers

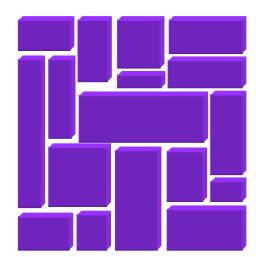

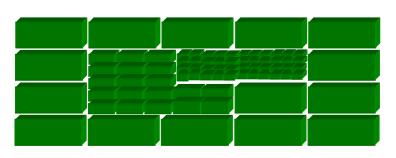

Scientific Data Objects & Interfaces

- Define "Standard" Interfaces for HPC Scientific Data
 - Descriptive, Not (Necessarily) Generative...
- Basic Scientific Data Object
 - David Bernholdt, ORNL
- Structured & Unstructured Mesh
 - Lori Freitag, ANL
 - Collaboration with SciDAC TSTT Center
- Block Structured AMR
 - Phil Colella, LBNL
 - Collaboration with APDEC & TSTT

Basic Scientific Data Interfaces

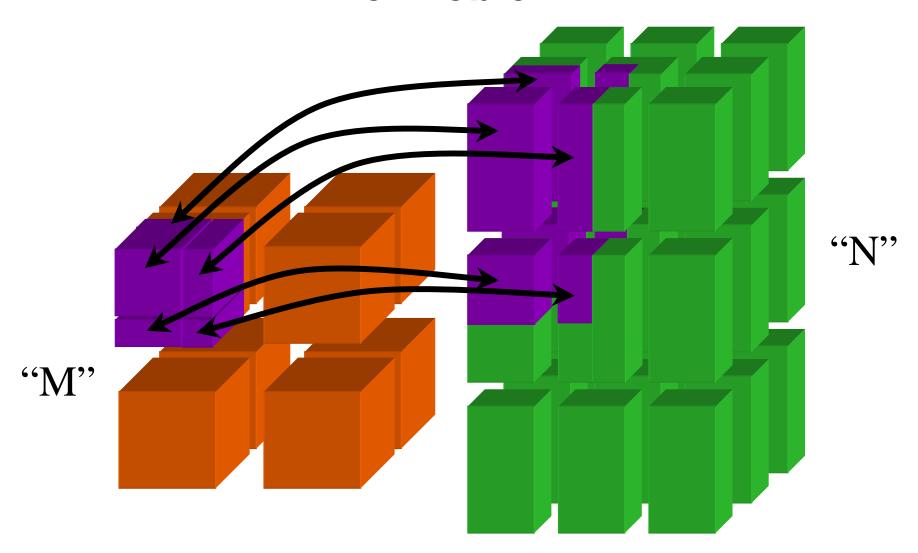

- Low Level, Raw Data
 - Supports high performance access to memory
 - Based on IOVec

(e.g. http://www-sld.slac.stanford.edu/HELP/POSIX/DATA_STRUCTURES/IOVEC)

- Assumes a contiguous memory block
- Supports basic data types such as integer, float, double
- No topology information
- Local & Distributed Arrays
 - Abstract interfaces for higher-level data description
 - 1D, 2D, 3D dense arrays
 - Various distribution strategies
 - HPF-like decomposition types (Block/Cyclic...)

"MxN" Parallel Data Redistribution: The Problem...

"MxN" Parallel Data Redistribution: The Problem...

- Create complex scientific simulations by coupling together multiple parallel component models
 - Share data on "M" processors with data on "N"
 - M != N ~ Distinct Resources (Pronounced "M by N")
 - Model coupling, e.g., climate, solver / optimizer
 - Collecting data for visualization
 - Mx1; increasingly MxN (parallel rendering clusters)
- Define "standard" interface
 - Fundamental operations for any parallel data coupler
 - Full range of synchronization and communication options

Hierarchical MxN Approach

- Basic MxN Parallel Data Exchange
 - Component implementation
 - Initial prototypes based on CUMULVS & PAWS
 - Interface generalizes features of both
- Higher-Level Coupling Functions
 - Time & grid (spatial) interpolation, flux conservation
 - Units conversions...
- "Automatic" MxN Service via Framework
 - Implicit in method invocations, "parallel RMI"

http://www.csm.ornl.gov/cca/mxn/

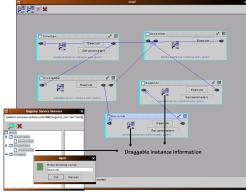

CCA Frameworks

- Component Containers & Run-Time Environments
- Research Areas:
 - Integration of prototype frameworks
 - SCMD/parallel with distributed, bridged for one application
 - Unify framework services & interactions...
 - Language interoperability tools
 - Babel/SIDL, incorporate difficult languages (F90...)
 - Production-scale requirement for application areas
 - Component deployment
 - Component repository, interface lookup & semantics

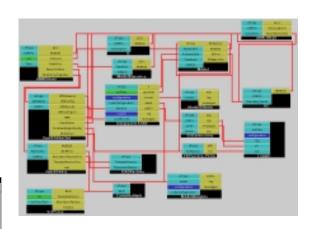

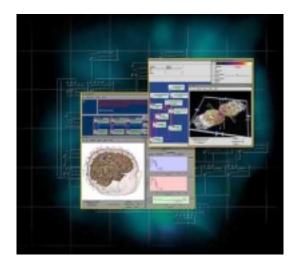

CCA Framework Prototypes

- Ccaffeine
 - SPMD/SCMD parallel
 - Direct connection
- CCAT / XCAT
 - Distributed
 - Network connection
- SCIRun
 - Parallel, multithreaded
 - Direct connection
- Decaf
 - Original language interoperability via Babel...

Outreach and Applications Integration

- Tools Not Just "Thrown Over The Fence"...
- Several Outreach Efforts:
 - General education and awareness
 - Tutorials, like this one!
 - Papers, conference presentations
 - Strong liaison with adopting groups
 - Beyond superficial exchanges
 - Real production requirements & feedback
 - Chemistry and climate work within CCTTSS
 - Actual application development work (\$\$\$)
- SciDAC Emphasis
 - More vital applied advanced computing research!

Active CCA Forum Working Groups

- Adaptive Mesh Refinement
- Generalized Data Objects
- Tutorial Presentations
- Application Domain Groups:
 - Climate, Chemistry
- MxN Data Redistribution
- Embeddable Scripting
- Fortran Users
- Babel Development & Users
- Deployment / XML Schemas
- Ccaffeine Open Framework
- Component-Based Debugging...

See http://www.cca-forum.org/working_groups.html for more info.

Current CCA / CCTTSS Status

- CCA Specification at Version 0.6
- Several Operational Prototype Frameworks
- Growing Number of Reusable Component Modules
- Draft specifications for
 - Basic scientific data objects
 - MxN parallel data redistribution
- Demonstration Software Available for Download
 - Several Multi-Component Parallel and Distributed Demonstration Applications
 - Variety of components for: optimization, solvers, meshes, data decompositions, visualization, MxN...
 - RPM packages for easy Linux install!

http://www.cca-forum.org/software.html

CCA Tutorial Summary

- Go Forth and Componentize...
 - And ye shall bear good scientific software
- Come Together for Domain Standards
 - Attain true interoperability & code re-use
- Use The Force:
 - http://www.cca-forum.org/tutorials/
 - tutorial-wg@cca-forum.org
 - cca-forum@cca-forum.org
